

## Ultra-Short Throw (UST)

Available Exclusively for the Nero Series

### Producers of Professional Projection Screens

<b>Material Type</b>	Semi-Rigid Front	<b>Edge Blending Properties</b>	N/A
<b>Minimum Throw Distance</b>	<.3 x image width	<b>Passive 3D Use</b>	No
<b>Peak Gain</b>	0.35	<b>Lay Flat Quality</b>	Excellent
<b>Viewing Angle</b>	170°	<b>Flame Resistance</b>	Yes
<b>Ambient Light Resistance</b>	Excellent	<b>Acoustic Transparent</b>	No

This UST screen is grey in pigment colour and has microscopic lenticular ridges. This screen includes layers of angular-reflective material as well as optical and absorptive microscopic beads, to improve the viewing angle, redirect and/or absorb ambient light from the sides, and adjust the screen's gain. The screen should be installed with the projector positioned below it, so that images are projected upward. In this position, ambient light from above is blocked, providing very high image contrast.
